

Get into the World of General Tire

Superior on tracks, powerful off the road ...

The tyre that meets every challenge:

GRABBER HTS

The Grabber HTS guarantees great driving fun off-road and on firm surfaces. Innovative tread pattern design from General Tire ensures the perfect synthesis of comfort, performance and durability.

This tyre has a powerful grip and reacts in an optimal way to all surface demands in the most varied weather conditions. The reduced rolling resistance minimises wear and fuel consumption.

The tread pattern, based on the latest technological findings, ensures efficient off-road performance and good track holding on asphalt.

GRABBER HTS – ready to roll on any type of ground

Pattern	Rim diameter	Size	Load / Speed index	Extra Load (XL)	Sidewall	Permitted rim width		Dimensional tyre data		Tread pattern depth (mm)	Rolling circumference 1.5%-2.5% (mm)
						min. (inch)	max.	max. in service outer-ø (mm)	on measuring rim width (mm)

With its intelligent DURAGEN technology the Grabber HTS sets new standards. The tyre's innovative tread pattern design makes it extremely flexible, whatever the conditions. This is the right tyre for all those drivers who mainly use the road, but also want to be able to go off-road if necessary.

- 1 Stabilizing tread ribs
- 2 Lateral drainage grooves
- 3 High-tech contour
- 4 Optimized longitudinal grooves

Performance features

- 1 DURAGEN technology
- 2 Groove geometry with a flexible response
- 3 Lateral drainage grooves
- 4 Optimized longitudinal grooves
- 5 High-tech contour

Benefits

- 1 Designed according to the latest technological standards, the tread pattern ensures performance in extreme conditions and track holding on all asphalt surfaces.
- 2 Thanks to its stabilizing tread ribs before the shoulder section, the Grabber HTS sits firmly and safely on the road and offers outstanding steering precision.
- 3 Lateral grooves channel water efficiently out of the tread, enhance traction and reduce aquaplaning risk.
- 4 Longitudinal grooves reduce braking distances, improve acceleration and steering performance on slippery ground.
- 5 The tread area sits evenly on the ground, reduces fuel consumption and thus CO₂ emissions.
